

FPGA RESEARCHER · EMBEDDED SOFTWARE DEVELOPER · ANDROID DEVELOPER · TECH ENTHUSIAST

Unit 307, 250 Lester Street, Waterloo, Ontario, Canada

□ (+1) 226-606-1053 | Image: Ic6chan@uwaterloo.ca | Image: Image: Ic6chan@uwaterloo.ca | Image: Image: Image: Ic6chan@uwaterloo.ca | Image: I

Education

University of Waterloo

Sept. 2015 - Apr. 2020 (expected) May. 2020 - Apr. 2021 (expected) **BASc**, Electrical and Computer Engineering **MASc**, Electrical and Computer Engineering

Waterloo, Canada Waterloo, Canada

Academic Research

UWaterloo Configurable Architecture Group

University of Waterloo

Undergraduate Research Assistant

Jan. - Aug. 2019

- Pubished a paper called 'Partitioning FPGA-Optimized Systolic Arrays for Fun and Profit' and presented in the ICFPT 2019 hosted in TianJin and received the Best Paper Award
- Built simulation tool in Python for modeling specific memory structure to generate cycle-accurate read/write traces allowing estimation on hardware performance before implementation

Real-Time Embedded Software Group

University of Waterloo

ENGINEERING PROJECT COURSE - ECE499

Jan. - Apr. 2020

- Studied and design a benchmark suite for testing Apache Flink's Data Streaming API measuring the lantency created by the framework
- Set up

Work Experience

Smartwave Technologies

Toronto, CA

EMBEDDED SOFTWARE ENGINEERING

Aug. - Dec. 2019

- Implemented a post-quantum cryptosystem CRYSTALS-Kyber on FPGA board using VHDL allowing future-proof security standard to increase product value
- Implemented a post-quantum cryptosystem **CRYSTALS-Kyber** on **FPGA** board using **VHDL** allowing future-proof security standard to increase product value

Envieta System LLC Maryland, US

FPGA CRYPTO DEVELOPER

Aug. - Dec. 2018

- Implemented a post-quantum cryptosystem CRYSTALS-Kyber on FPGA board using VHDL allowing future-proof security standard to increase product value
- · Verified the implementation on DE10-Nano board running drivers written in C to ensure run-time requirements and security standards
- Incoporated the usage of multi-port memory allowing a 4x speed up on the system's critical path

Sensibill Inc.

Toronto, CA

Android Developer

Jan. - Apr. 2018

- Integrated a smoother UI experience allowing the user to capture longer receipts by using shape and contour detection in OpenCV, resulting
 in better image quality and higher accuracy data extraction from the receipt
- · Redesigned receipt capture function using Kotlin from scratch for higher readability and cleaner architecture

Ritual Technologies Inc.

Toronto, CA

MOBILE DEVELOPMENT ENGINEERING

May. - Aug. 2017

- Accomplished smooth transition to Android Oreo by restructuring notifications using Notification Channels and adding AutoFill onto the sign-in flow
- Added easy-switching between testing servers to visualize in-progress features in the compiled application, resulting in 30% shorter development time for new features

Skills

Programming Languages Python, C/C++, JAVA, Kotlin, VHDL, Verilog

Web Django with Python, React

Tools Docker, Adobe PhotoShop, Adobe XD

Languages English, Madarin, Cantonese

MARCH 9, 2020 LONG C. CHAN · RÉSUMÉ
